PRODUCT NAME

Onions sweet and sour

code :35006273

GENERAL INFORMATION

The preserved onions have been produced from fresh harvested fruits of the variety of Allium Cepa L. After harvesting the fruits have been rinsed, pre-calibrated, cleaned, peeled, washed, calibrated and inspected visually. These onions are filled into jars with the addition of cover liquid. The filled jars are closed with a twist off cap under a steam jet to remove the residual oxygen. After closing, the jars are pasteurized for bacteriological stability. The onions have a white appearance, the taste is typically for an aromatised vinegar product.
